

Romantic Coastline

1 MATSI BEACH

The sandy Matsi Beach is a natural beach that is the perfect place for enjoying some privacy. The beach is surrounded by a beautiful pine forest growing on dunes, and there are also many different meadows and juniper groves nearby. There is also a small fishing port.

Matsi küla, Lääneranna vald, Pärnumaa

2 VALGERANNA BEACH

Valgeranna Beach, located near Pärnu, is a popular destination among locals and guests. There, you will find the Valgeranna Adventure Park and White Beach Golf.

Valgeranna küla, Pärnu, Pärnumaa

3 KABLI BEACH

Families with children love the shallow and warm sea. Kabi beach also has a promenade, an observation tower, and a summer café.

Kabi küla, Häädemeeste vald, Pärnumaa

4 LAKE ERMISTU

There are plenty of fish in the lake and thus, it is a favourite spot for recreational fishers. The mud in the lake has been acknowledged as curative mud. There is a holiday complex and boat rental on the shore of the lake.

Ermistu küla, Pärnu, Pärnumaa

5 LAKE TÕHELA

The shallow and warm lake is perfect for families. There is a watchtower, a holiday complex, and you can also go on a boat ride on the lake.

Männikuste küla, Pärnu, Pärnumaa

6 MANIJA LANDSCAPE PROTECTION AREA

The second largest island in Pärnu is special thanks to its heritage cultural landscapes: coastal meadows rich in birds and frogs.

Manija saar, Pärnu, Pärnumaa

7 LUTEMAA NATURE RESERVE

Sand dunes full of pine forests border the entire Romantic Coastline, and the highest dunes are located in Luitemaa. The former sea lagoon behind the sand dunes has, over thousands of years, turned into a beautiful bog. A 2.2 km long boardwalk that starts at the observation tower leads to the bog. There are two bird observation towers on the same coastal meadow, near the Pikla ponds.

15 MIHKLI OAK FOREST

The oak forest, which is over 250 years old and located near Mihkli village, the former parish centre, is the most representative natural oak forest in Estonia. It was placed under nature conservation in 1957.

Mihkli küla, Lääneranna vald, Pärnumaa

16 NEDREMA WOODED MEADOW

Nedrema wooded meadow is one of the largest of its kind in Estonia and Europe. The area was listed as protected area in 1991 and as a result of this, the size of the mowable area has increased to nearly 100 hectares.

Nedrema küla, Koonga vald, Pärnumaa

Manija landscape protection area

17 ALLIKUKIVI CAVES

You can see large underground caves on the slope of the Allikukivi old valley. The caves, which were created by springs, were discovered in 1961. They are 33 m long and up to 2.7 m tall.

Allikukivi küla, Saarde vald, Pärnumaa

18 PANGA FARM ROSE GARDEN

The Panga Farm rose garden has flowers from forgotten farms, fields, parks, and gardens of our ancestors.

Ura küla, Lääneranna vald, Pärnumaa

19 HERB GARDEN OF TAMME FARM

In the herb garden, you can explore exciting plants from every corner of the world. In the summer, there is a cosy café and a farm shop full of different flavours.

Malda küla, Pärnu, Pärnumaa

20 KÄRSU GARDENS

The Metste Farm chilli greenhouse was opened in 2018. The spiciest flavours in the world are represented there. The greenhouse looks the best in August, when there are many different colours. There are nearly 120 different chillies.

Kärsu küla, Saarde vald, Pärnumaa

21 KIHNU LIIVA-AA BOULDER

The Kihnu sea and coast are very rocky, but there are not a lot of large boulders. The Liiva-aa boulder or Liiva-aia boulder, located in Linaküla pine grove, is the largest boulder in Kihnu. The circumference of the protected boulder is about 10 m and its height 2.5 m. According to a legend, something lives under the rock – it has been heard. It is also said that Mulgi witches dry themselves on the boulder at night.

Linaküla, Kihnu vald, Pärnumaa

22 KIHNU MANOR LINDENS

The outbuilding of the manor has survived and is currently used for dwelling. The ancient lindens have survived from the former amazing manor garden. These ancient trees are under nature protection. The girth of the largest of them is 3.7 m and it is 18 m tall. One of the three lindens has, unfortunately, fallen. This is a perfect location to have a picnic during the summer, especially during the flowering of the lindens.

Linaküla, Kihnu vald, Pärnumaa

Soomaa

SOOMAA NATIONAL PARK

was established in 1993 for the protection of untouched bogs, meadows and wooded meadows rich in species, and diverse forests. Now, visitors know Soomaa best for its great flood or the so-called fifth season. Then, high water floods the Soomaa National Park. This usually happens at the beginning of spring, as the winter snow begins to melt, but it can also happen in other seasons. As the weather is very unpredictable, it may not flood at all in some years. At the same time, the water can rise by more than several metres and flood very large areas. During the fifth season, the best way to explore Soomaa is by canoe. Some years, water has flooded the areas but then, it has gotten cold again, which means that Soomaa turns into one big skating rink. The fifth season brings thousands of visitors to Soomaa National Park every year, making it one of the most popular national parks in Estonia. It is also possible to go on a canoe trip in Soomaa in other seasons. There are different hiking trails in the national park. Hiking with snowshoes is very popular among our guests – Estonia is one of the few places where this can be done. Snowshoes are special shoes that allow you to walk in damp bogs. We recommend discovering Soomaa with our professional guides.

1 BEAVER TRAIL (1.8 KM)

2 MEIEKOSE STUDY TRAIL (5.6 KM)

3 INGATSIS STUDY TRAIL (4.3 KM)

The 3 km Ingatsi study trail starts at Karuskose before winding its way through the forest to the Kuresoo bog, which is, at 8 metres, Europe's highest. The observation platform offers beautiful views over the bog landscape, including the surrounding Toonoja forests. The boardwalk then continues around picturesque pools, meandering through the bog before directing walkers back the way they have come. The full hike takes at least 1.5 hours. The trail has a number of rest areas where you can rest your legs and take a dip in the refreshing waters.

4 RIISA BOG TRAIL (4.8 KM)

You will find a sign by the Jõesuu-Tõramaa Road that invites you to a boardwalk in the beautiful Riisa

bog. The trail passes 8 rest stops and an observation tower. A motorway, a car park, and an outhouse are located right by the gate at the beginning of the trail. The hike begins in a spacious bog and briefly runs through the forest. In places like these, you can see the forest turning into a bog and vice versa – dry ground is replaced by wet land, and swamp plants with ancient spruce forests. You can also see some beautiful swamp pools by the trail. This is a perfect location for a family picnic! Riisa study trail is also accessible with a wheelchair and a baby carriage until the first swamp pool at the 1.2 km mark.

5 LEMMIJÕE KEELEMETSA STUDY TRAIL (5.8 KM)

6 PAUNA CULTURAL HIKING TRAIL (3 KM)

7 KUURANIIDI STUDY TRAIL (1 KM)

8 HÜPPASAARE STUDY TRAIL (4.4 KM)

The Hüpasaare hiking trail winds through a stunning forest to the Kuresoo bog. The boardwalk passes through a landscape of unique, oval-shaped bog pools to an observation platform, where you can rest your legs and admire the tranquility of the setting. The boardwalk then takes you to a bog island, where you can observe the comings and goings of the resident crows, and onto a meadow covered with a scattering of trees. At the end of the trail, you will find the Mart Saar Museum and a camping area.

Sandra küla, Põhja-Sakala vald, Viljandimaa

19 LÄTI MEADOW

The spacious meadows in Läti village in Soomaa are a beautiful sight at any time of the year, but this area is particularly interesting during the seasonal flood period. Then, the whole area is under floodwater and only roadways are visible between the fields of water, and often, even these are partly covered in water. This usually happens in the spring, when the thaw and rain water come together and the surface is not able to absorb all of the water. The water level rises in 3 to 4 days and stays high for a couple of weeks. A similar sight can also be seen during a very rainy autumn.

Tipu küla, Põhja-Sakala vald, Viljandimaa

+372 5302 5085
puhkeala.ee/vaba-aeg/matkarada

13 PARIKA STUDY TRAIL (3.6 KM)

The 3.6-kilometre trail is famous for its heart-shaped bog lake. Photographs taken of the lake from the air are used in many publications of Viljandi County. The trail is suitable for groups as it is wide enough all the way to the lake. The trail is also suitable for people with reduced mobility. The trail

is surrounded by forests full of blueberries and in the bog, you can find cloudberry and cranberries.

Aimla küla, Põhja-Sakala vald, Viljandimaa

14 JÕESUU SUSPENSION BRIDGE

The bridge crosses River Pärnu and is the longest suspension bridge in Pärnu County. The bridge is 67.5 metres long and it was built in 1975.

15 LÕHAVERE LEMBITU HILLFORT

Named after the ancient Estonian chief Lembitu, the fort was founded at the end of the 12th century. It was used for about 20 years. Towering in the middle of the forest, the hill of the fort with its naturally deep slopes leaves an imposing impression even today. On the foot of the hillfort, a monument in freedom-fighters' memory is erected. Good to know: Lembitu was the first Estonian to be mentioned by his name in historical records.

Lõhavere küla, Põhja-Sakala vald, Viljandimaa

16 TORI HELL CAVE

You will find a mysterious cave in the steep riverbank in Tori. The place has been known as Tori Hell for several hundreds of years as you can go deep into the ground from the cave. This is the reason why there are so many folk stories and legends about the place. The cave was created by the water in the streams eroding the Devon sandstone bank of the Pärnu River. The opening of Tori Hell was 6 metres in diameter and some sources say that the passage to hell' was 32 metres long. The ceiling of the cave collapsed in 1908 and its mouth in 1974. You can no longer go into the cave, but steps by the cemetery gates will take you to this beautiful and mysterious place.

Pärnu maantee 2, Tori alevik, Tori vald, Pärnumaa

17 OKSA OAK MEADOW AND RESTING AREA IN SOOMAA

Oksa oak meadow is located near the Kildu-Tõramaa road, in the immediate vicinity of River Lemmjõgi. As the meadow is located in Soomaa, it can be expected for the area to be flooded in the spring. In addition to the beautiful views, you can also have a look at the history of the local culture – after a short hike, you will find the ruins of an old tavern and a unique mantle chimney inside of them. On the other side of the road, there is an old barn which can be used as a forest hut, if necessary.

Sandra küla, Põhja-Sakala vald, Viljandimaa

18 MULGI HAYFIELD

Mulgi hayfield is a picturesque sparse woodland which is lovely to visit during every season. The beautiful landscape is made even more magnificent by the mysteriously meandering River Lemmjõgi, which can be crossed on a unique cultural object an arched bridge with an iron structure and wooden covering. The resting spot on the shore of the river is inviting and a perfect location for enjoying the surroundings any time of the year.

Sandra küla, Põhja-Sakala vald, Viljandimaa

19 LÄTI MEADOW

The spacious meadows in Läti village in Soomaa are a beautiful sight at any time of the year, but this area is particularly interesting during the seasonal flood period. Then, the whole area is under floodwater and only roadways are visible between the fields of water, and often, even these are partly covered in water. This usually happens in the spring, when the thaw and rain water come together and the surface is not able to absorb all of the water. The water level rises in 3 to 4 days and stays high for a couple of weeks. A similar sight can also be seen during a very rainy autumn.

HIKING TRAILS AND STUDY TRAILS

1 TAAGEPERA HIKING TRAIL (5.4 KM)

The trail begins and ends at the Taagepera campfire site. The trail is located on the shore of River Ohne and there, you can see traces of beavers, red wood ants, and many species of trees: larches, firs, oaks, and more. The trail can also be completed in smaller circles of 1.6 km and 4.0 km. More information about the trail is available on the information boards.

Taagepera küla, Tõrva vald, Valgamaa

2 LOODI LARCH STAND HIKING TRAIL (0.5 KM)

The trail is 0.5 km long. The larch stand covers about half a hectare and is impressive with its huge European larch trees. It is one of the oldest stands of the European larch (*Larix decidua*) in Estonia. The tallest tree is 43.3 metres. The park was established in 1820 by solving by the landowner of Loodi, von Bock. The trail is marked with white circles on trees.

Loodi küla, Viljandi vald, Viljandimaa

3 SUISLEPA HIKING TRAIL (1 KM)

The boardwalk of the Suislepa hiking trail is open for visitors in summer and winter. You can also complete the trail by bike or with a baby carriage. There are information boards introducing the tree species near the trail. In Suislepa, you can also explore a restored windmill and a manor.

Suislepa küla, Viljandi vald, Viljandimaa

4 LOODI NATURE PARK AND SAND DENUDATION, HIKING TRAIL (2 KM)

The Loodi nature park covers an area of 3,467 hectares. You can go to the hiking trail (2 km) both from Paistu and through the yard of Loodi Manor. There is a car park on both sides. If you start from the manor, you will find a spacious campfire site at the beginning of the hiking trail. The red sandstone outcrop (called the Loodi Hell) with several springs is worth visiting.

Loodi küla, Viljandi vald, Viljandimaa

5 ÕISU OLD VALLEY HIKING TRAIL (2.4 KM) AND LAKE ÕISU AND OBSERVATION TOWER

The trail is fully covered with woodchips and there are barriers, stairs, and observation platforms on the shore of the steep stream. An attentive observer will also find the contours of the water-carrying virgin figure on the outcrop. There is an 8-metre bird observation tower on the shore of the lake.

Õisu alevik, Mulgi vald, Viljandi maakond

6 TERINGI STUDY TRAIL (4.5 KM)

The boardwalk, covered with anti-slip mesh, and the safe woodchip path take the visitor across several bog islands. Information boards along the trail give a thorough overview of wild animals and bog communities. From July, you can pick cloudberries, crowberries, blueberries, bog bilberries, cobjerries, and cranberries here. After a healthy snack, you can go for a refreshing swim to the brown-water Alatsi Lake. There is a camping site and a rest area / picnic spot at the beginning of the trail.

Lilli küla, Mulgi vald, Viljandi maakond

7 SOKAORU HEALTH TRAIL (5 KM) AND KARKSI ARTIFICIAL LAKE

The health trail is 5 km long, but you can choose 0.8 km, 1.5 km, 2 km, or 3 km trails. 1.5 km of it is illuminated. Part of the trail runs in the close proximity of the beautiful Karksi-Nuia artificial lake with several swimming and resting places. In winter, you can also skate on the lake.

Ettevõtluse tänav, Karksi-Nuia linn, Mulgi vald, Viljandimaa

8 INKU HIKING TRAIL

9 LILLI NATURE HOUSE STUDY TRAIL

10 SPRING SINIALLIKAS, SINIALLIKU LAKE, SINIALLIKU HIKING TRAIL (1.3 KM)

The spring was an ancient sacrificial spring, named after its crystal-clear water and its characteristic blue colour, which is due to the blue clay settled at the bottom of it. Nearby, there is a hillfort, where ancient Estonians built a stronghold in the 12th–13th century, and Lake Sinialliku. You can start the hike from the old Sinialliku Railway Station or from Karksi-Nuia–Viljandi road.

Sinialliku küla, Viljandi vald, Viljandimaa

HIKING TRAIL ON THE NARROW-GAUGE RAILROAD 'GREEN RAILWAYS'

The hiking trail runs in the southern part of Estonia and in the northern part of Latvia. The total length of it is about 700 kilometres and 290 km of it is located on a narrow-gauge railway bed.

11 'GREEN RAILWAYS' SINIALLIKU-LOODI HIKING TRAIL (5/10 KM)

The trail runs along a narrow-gauge railway bed and it is suitable for adventurers of all ages, as there are no steep ascents or descents. The trail can be completed on foot, by bike, on skis, or on a horse. The hiking trail is marked with information boards, signposts, and kilometre marker posts. There are also pictures of the history of the railway. The trail passes the beach on the shores of Lake Sinialliku, where you will find a lovely resting spot and a table and chairs for dining.

12 'GREEN RAILWAYS' MOISAKÜLA-ABJA HIKING TRAIL (11 KM)

The area of the Tünder Nature Reserve is 1,846.8 ha. The nature reserve was established in 1999 to preserve the natural development of the bog forest landscape and its communities. The forests of the region are marshy and the communities belong to the swamp forest type group. You can spend a long holiday on the shores of the beautiful Lake Tünder. There is a shelter, a dry toilet, an information board, a covered campfire site with a grill, a woodshed, and a swimming dock.

13 LAKE PARIKA OBSERVATION TOWER

Take the boardwalk to the observation tower. It is believed to be about 9,000 years old, which makes it one of Estonia's oldest bogs. It is a bog with trees, mostly pine trees. The observation tower on the edge of the bog offers a view of the incredible bog landscape and the birds on the lake.

Parika küla, Viljandi vald, Viljandimaa

14 RUTU HILL

15 HÄRJASSAARE HILL (147 metres) is the highest place in the Sakala Upland and Viljandi County.

16 KÄRE BATTLEFIELDS

Käre Battlefields are unique thanks to the beautiful nature and rich history. Historically, Käre Farm has been involved in wars and the forest hides many bunkers, trenches, and military objects. Visitors feel like they are in the middle of a battle in 1944.

Jõgeveste küla, Tõrva vald, Valgamaa

17 LAKE VALGJÄRV IN KOORKÜLA

Valgjärv Lake has beautiful sandy shores, making it a perfect destination for a family holiday. There are ruins of an ancient settlement at the bottom of the lake. The ruins have been placed under archaeological protection. There is a State Forest Management Centre campfire site on the shore of the lake.

Jeti küla, Tõrva vald, Valgamaa

18 HELME CAVES

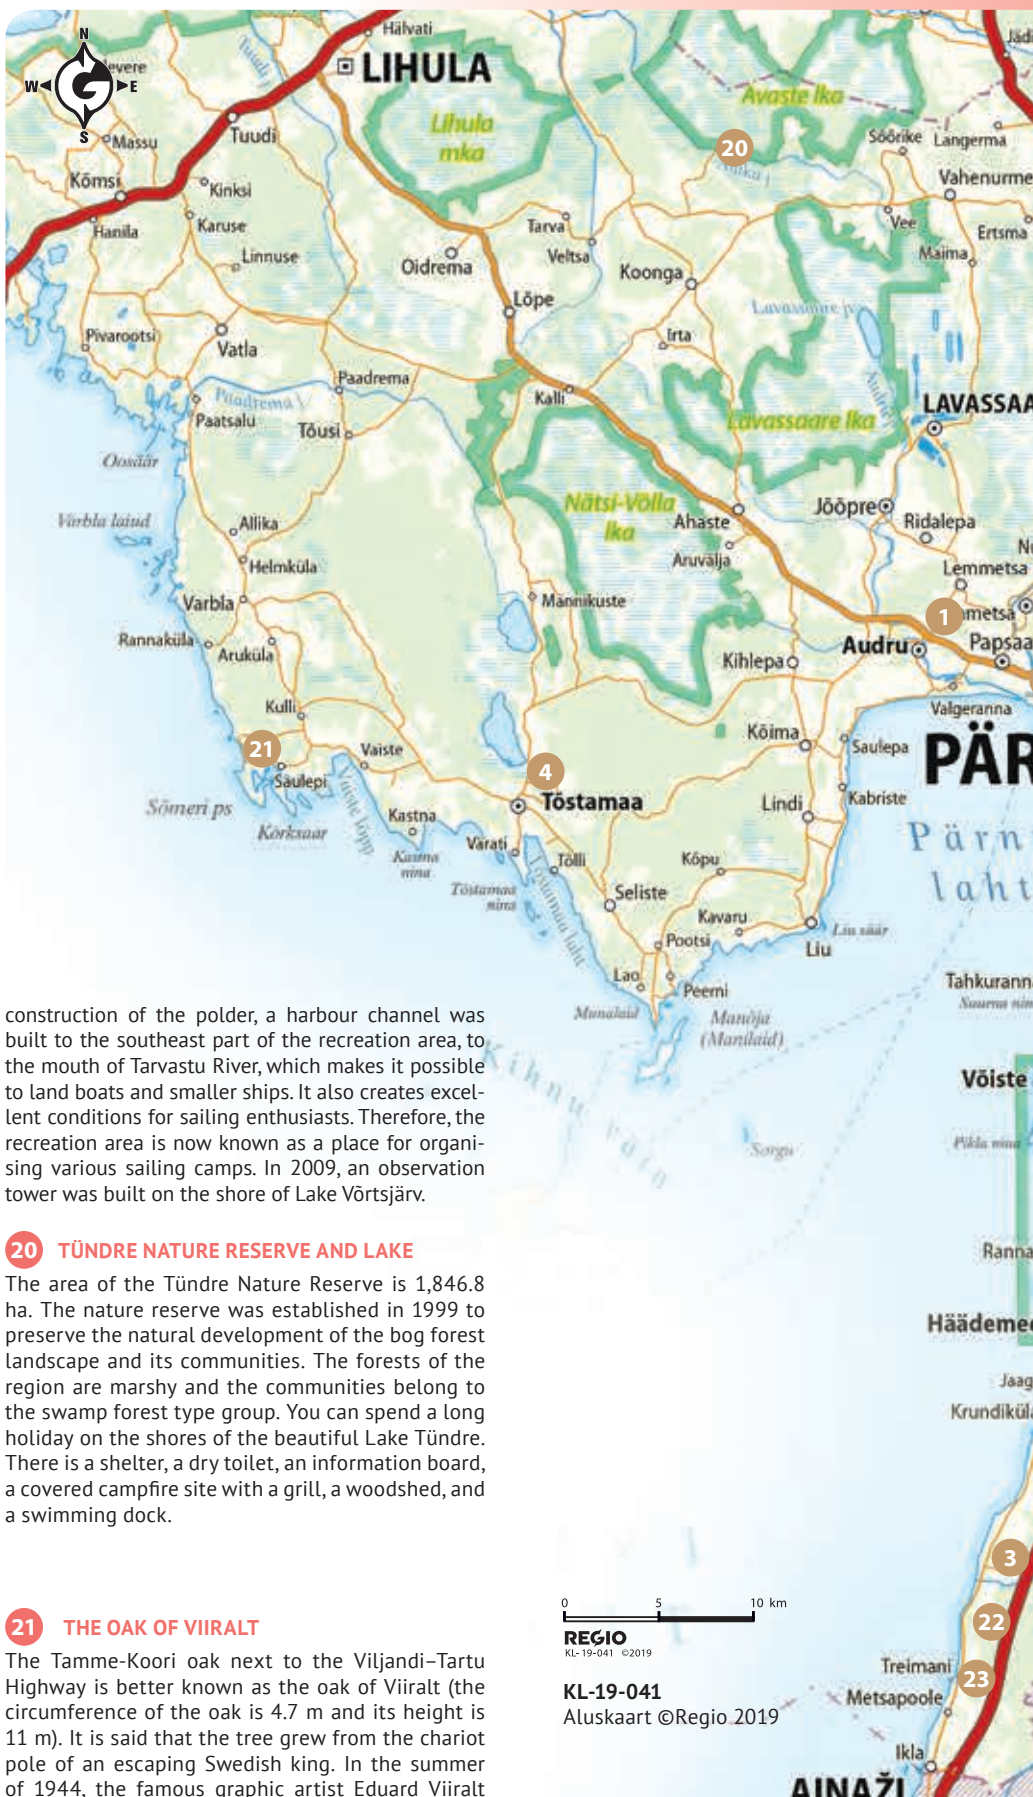

Helme caves – the most amazing grottoes in Estonia – can be seen in the Helme Manor Park. Situated to the north of castle ruins, the caves have a white Burntrock-stage layer of sandstone walls standing 3 metres tall. Some of the better-known caves have already collapsed. The caves once comprised of seven interlinked chambers, the biggest of which was known as the Church of Moses. The caves were created by springs and over the years, they have been dug out and used as shelters when needed.

Linna küla, Tõrva vald, Valgamaa

19 TARVASTU POLDER AND OBSERVATION TOWER

The polder is bordered with meadows and collector channels from several decades ago on the one side and with Lake Võrtsjärv on the other side. During the

21 THE OAK OF VIIRALT

The Tamme-Koori oak next to the Viljandi–Tartu Highway is better known as the oak of Viiralt (the circumference of the oak is 4.7 m and its height is 11 m). It is said that the tree grew from the chariot pole of an escaping Swedish king. In the summer of 1944, the famous graphic artist Eduard Viiralt (1898–1954) stayed in the farm that belonged to Gori Tamm. He depicted the tree in his drypoint *Viljandi maastik* ('Landscape of Viljandi').

22 LAKE VANAMOISA AND BEACH

Both locals and visitors from afar like to spend the summer by Lake Vanamoisa in Tõrva. The lake is on the edge of town by the Tõrva–Pikasilla road. The area of the lake is about 2 hectares and it is up to 10.5 metres deep. The main attraction of the lake is the tallest diving tower in Estonia (about 11 metres). Coast guard keeps an eye on the swimmers. You can lie on the sand or rest on the boardwalk or bridges, play volleyball, and there are also swings for the children. There are cabins where you can change clothes.

23 OIU HARBOUR AND OPEN-AIR MUSEUM

You can rent sailing ships, rowing boats, motorboats, canoes, and kayaks. You can also get to Oiu Harbour from Lake Võrtsjärv. 300 m upstream from River Tännassilm. There is an open-air museum and a 0.5 trail (boardwalk) along the water-meadow which offers a wonderful view of the lake.

KALESHIP AND SAILING SHIP TRIPS ON LAKE VÕRTSJÄRV

Kale is a traditional wooden trawler sailing ship characteristic of Lake Võrtsjärv. Thanks to its slender appearance, it was also often used for pleasure rides and regattas. It got its name from the large-meshed net or kale used for trawling. During the kaleship trip, the captain and boatswain will talk to you about the history of kaleships. You can also order smoked fish or eel soup.
